

Fig.10 Number of nuclei as a function of time (137°C).

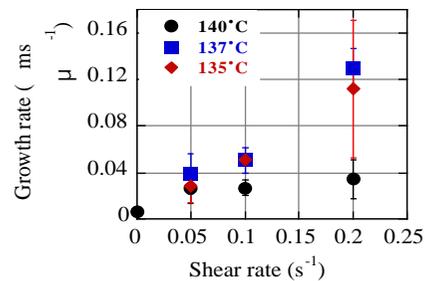

Fig.11 Growth rate as a function of shear rate.

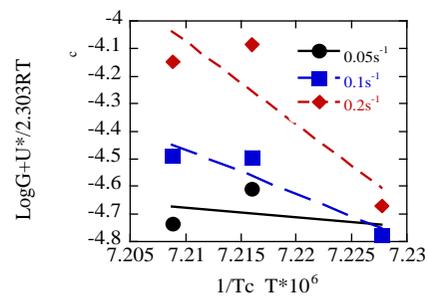

Fig.12 Kinetic analysis of linear growth rate under shear flow.

Tab.1 The value of $\dot{\gamma}_c$

$\dot{\gamma}$ (s ⁻¹)	$\dot{\gamma}_c$ (erg ² /cm ⁴)
0.05	13779
0.1	64482
0.2	12013

Results]

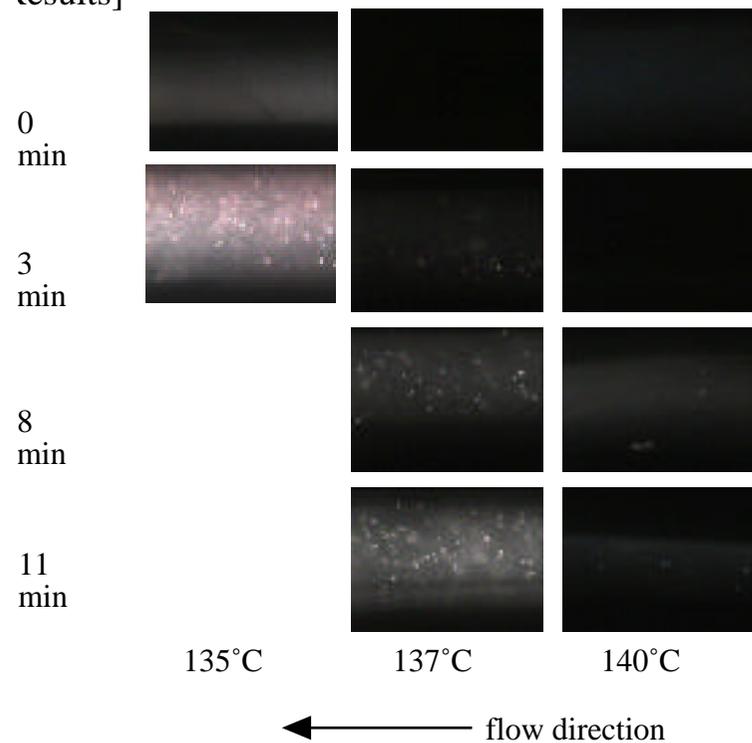

Fig.8 Typical snapshots of the observation ($\dot{\gamma} = 0.1s^{-1}$).

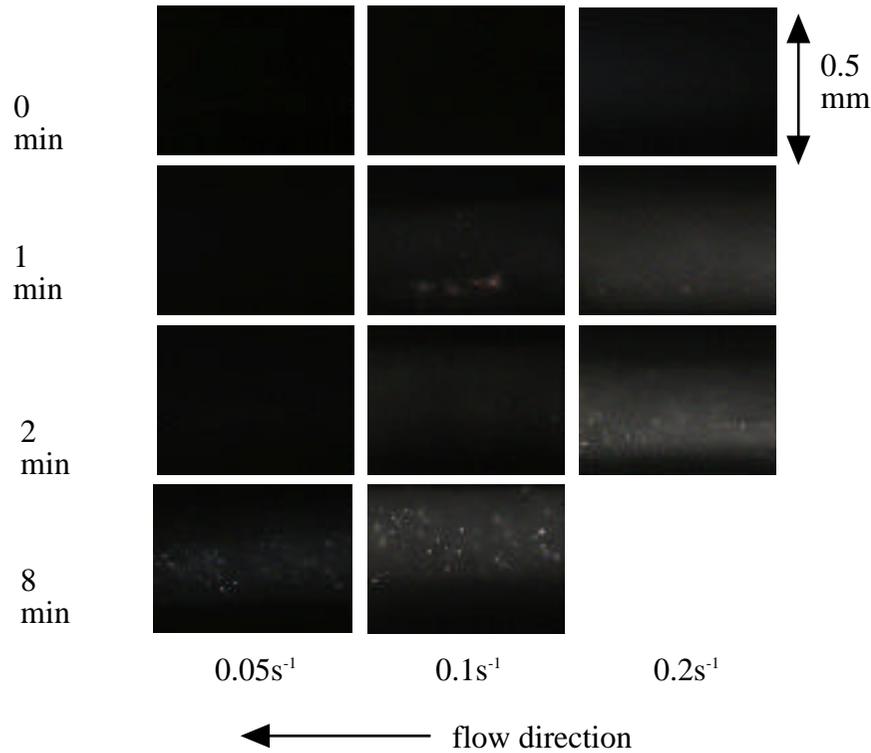

Fig.9 Typical snapshots of the observation ($T_c = 137^\circ C$).
